Introduction

This document is lab five of five total labs.

Please continue to use your file after completing Lab 4. If you are joining the DIAD at this point or were unable to complete previous labs, please start this lab with the provided **DIAD Final Report.pbix** file located in the Reports folder.

At the end of this lab, you will have learned how to share your dashboard and collaborate with other users. You will also have learned how to access your dashboard on your mobile device.

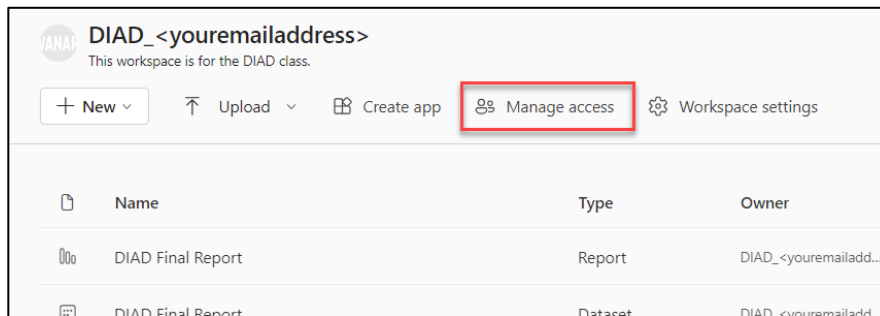

The lab includes steps for the user to follow along together with associated screenshots that provide a visual aid. In the screenshots, sections are highlighted with red or orange boxes to indicate the area the user needs to focus on.

NOTE: This lab uses real, anonymized data provided by ObviEnce, LLC. Visit their site to learn about their services: www.obvience.com. This data is the property of ObviEnce, LLC and has been shared to demonstrate Power BI functionality with industry sample data. Any use of this data must include this attribution to ObviEnce, LLC.

Power BI Service – Collaboration and Distribution

You have built the dashboard and are now ready to get feedback and collaborate with your team members.

1. **Sign in** to <http://app.powerbi.com> to access your workspace.
2. From the navigation pane to the left of the screen, select **Workspaces**.
3. Select the workspace **DIAD_<youremailaddress>** that you created previously.
4. Select the **Manage Access** button at the top of the page

5. The **Manage Access** dialog opens, and you should select the **+ Add people or groups** button. Enter the email addresses of the colleagues with whom you want to collaborate. Each user can belong to one of three roles as follows:

Contributor	Add/edit/delete content within workspace.
Member	Everything a Contributor can do. Re-share. Publish & update Apps.
Admin	Everything a member can do. Can change/delete workspace.
Viewer	Can add Admins. View/interact Read data stored in workplace Data Flows

6. Select the appropriate role and then select **Add**.
7. Once you have finished adding your colleagues, select **Close** at the top right.

Note: If you don't have a colleague's email, please close without submission.
If you do have a colleague's email to provide in the box, and after you have selected the **Add** button, you can ask your colleague to login and access the workspace.

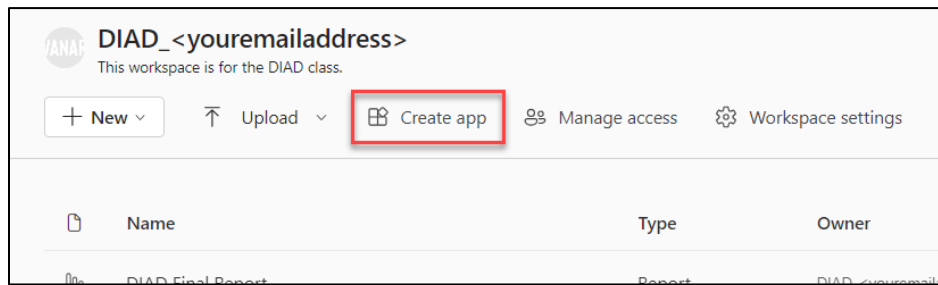

Now let's **share** the content we have created with report viewers and consumers. To start, we need to **publish** an app. An App can include multiple dashboards and reports.

8. Navigate back to your workspace called **DIAD_<youremailaddress>**.
9. On the **Workspace** page, notice there is an option named **Included in app** which can be selected to include the Dashboard in the App. Once we have created the App, the **Included in app** toggle will become enabled.

Name	Type	Owner	Endorsement	Sensitivity	Included in app
DIAD Final Report	Report	DIAD_<youremailaddress>	—	—	<input type="checkbox"/> No
DIAD Final Report	Dataset	DIAD_<youremailaddress>	—	—	<input type="checkbox"/> No
VanArsdel	Dashboard	DIAD_<youremailaddress>	—	—	<input type="checkbox"/> No

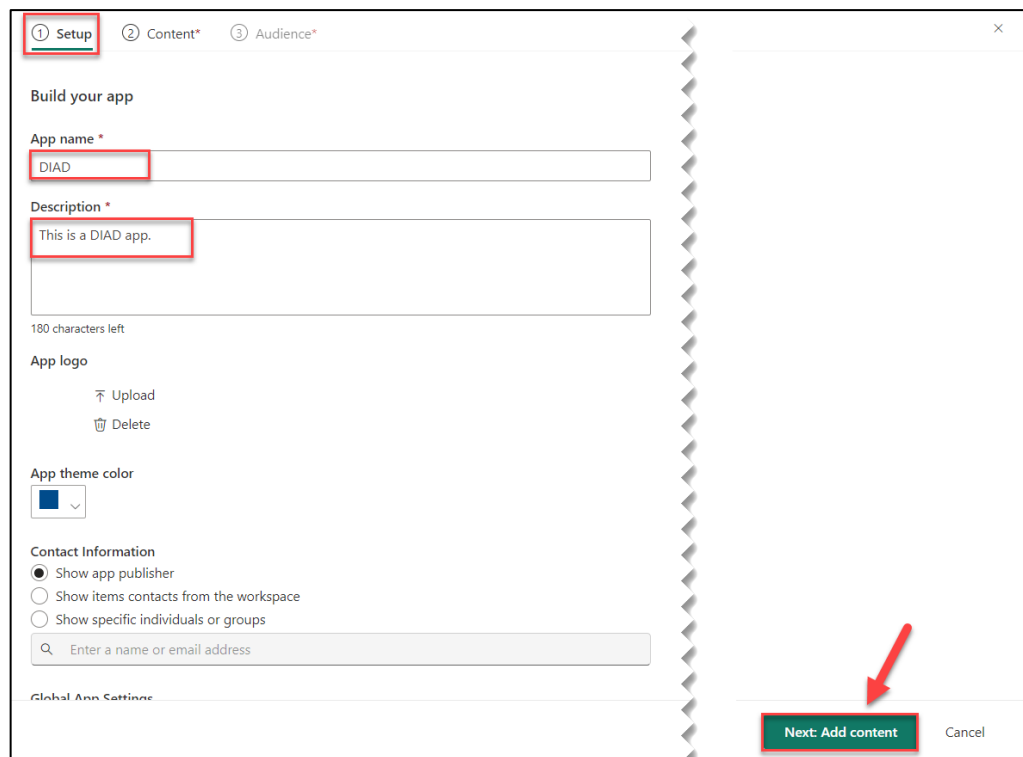

If you have reports and dashboards included in your workspace that you do not want to share with report viewers, an option will appear later to exclude these items.

10. In the top part of your screen, select the **Create app** button.

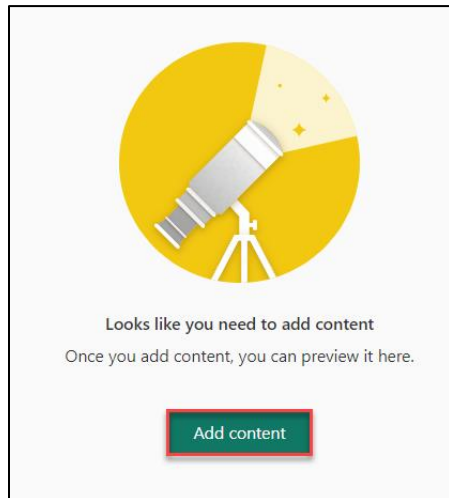

11. On the **Build your app** page, under the **Setup** tab, rename the app **DIAD**, and type **This is a DIAD app** in the **description** field.

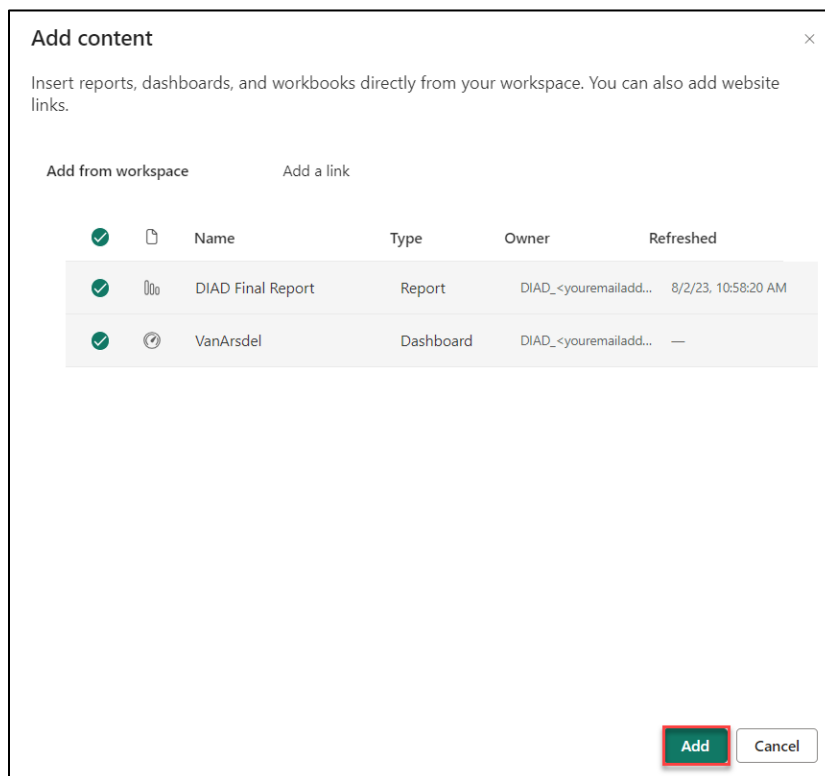

12. Then, select the **Next: Add content** button located in the bottom right corner of the Setup page.

13. Select the green colored **Add content** button located in the middle of the screen.

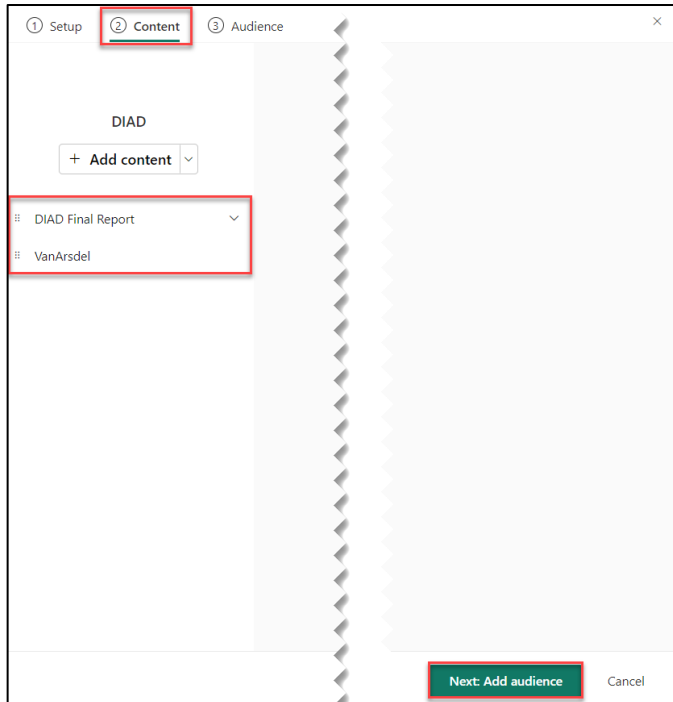

14. In the **Add content** dialog box that appears, select **DIAD Final Report (report)** and **VanArsdel (dashboard)**. Then, select the **Add** button located in the bottom right corner of the dialog box.

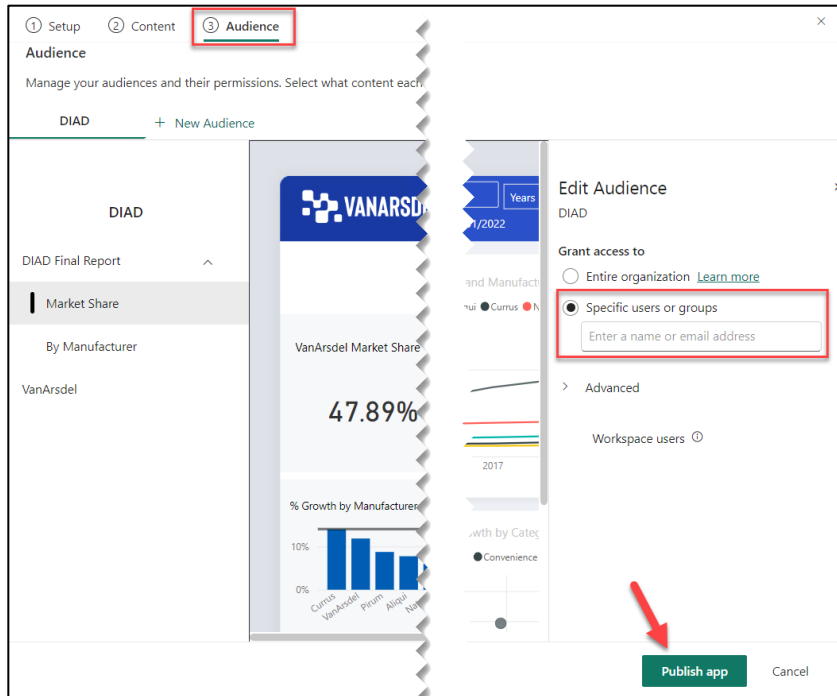

15. Notice that the newly added dashboard and report have been added to the list in the **Content** pane to the left.

16. Next, select the **Next: Add audience** button located in the bottom right corner of the Content page.

17. In the **Edit Audience** pane, enter the email(s) to whom you want to give access in **Specific users or groups** text box. Then, select the **Publish app** button located in the bottom right corner of the pane.

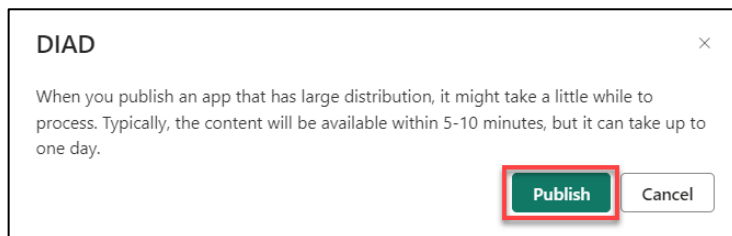

Note: If you do not have an email to share the app with, continue by selecting the *Publish app* button.

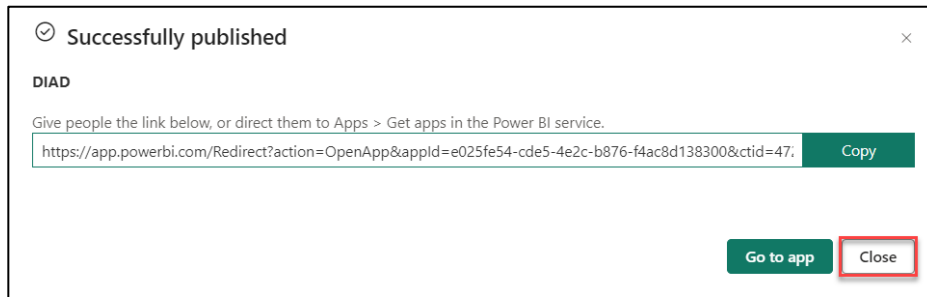

With Audiences, the authors can decide which content artifact such as reports, dashboards, etc. should be shared with specific audience groups within an App using a single workspace. This allows fine-grained access permissions for the App consumers who can consume various artifacts in the App based on their group permissions and minimizes operational overhead for the App authors.

18. The **Ready to publish** dialog appears, select **Publish**.

19. Once the App is published, a success dialog will appear.

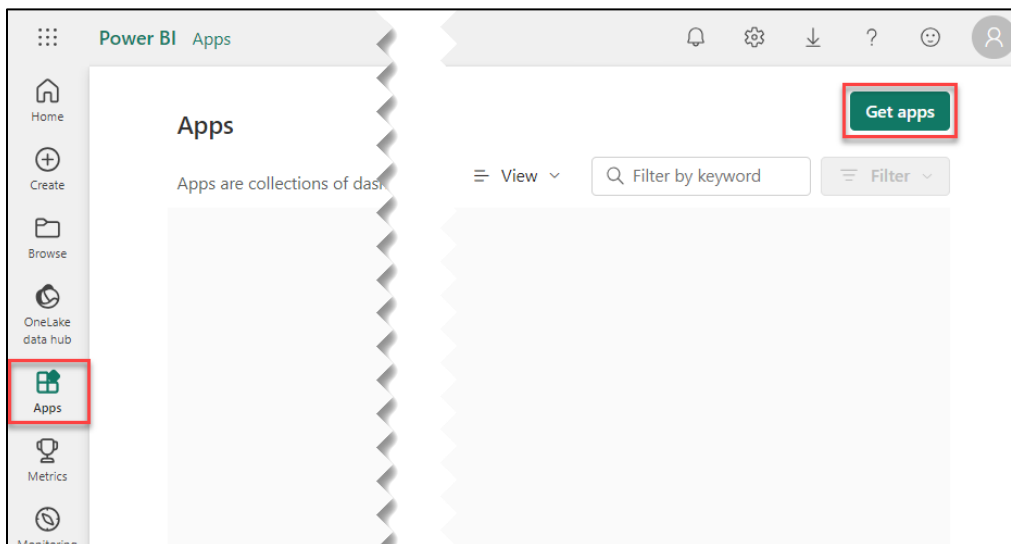

20. In the **Successfully published** dialog box, you can copy the link to the App and share it with individuals via email. Select the **Close** button.

A better way for report viewers to consume the App is by logging onto Power BI Service and registering the App. Let's impersonate a report viewer:

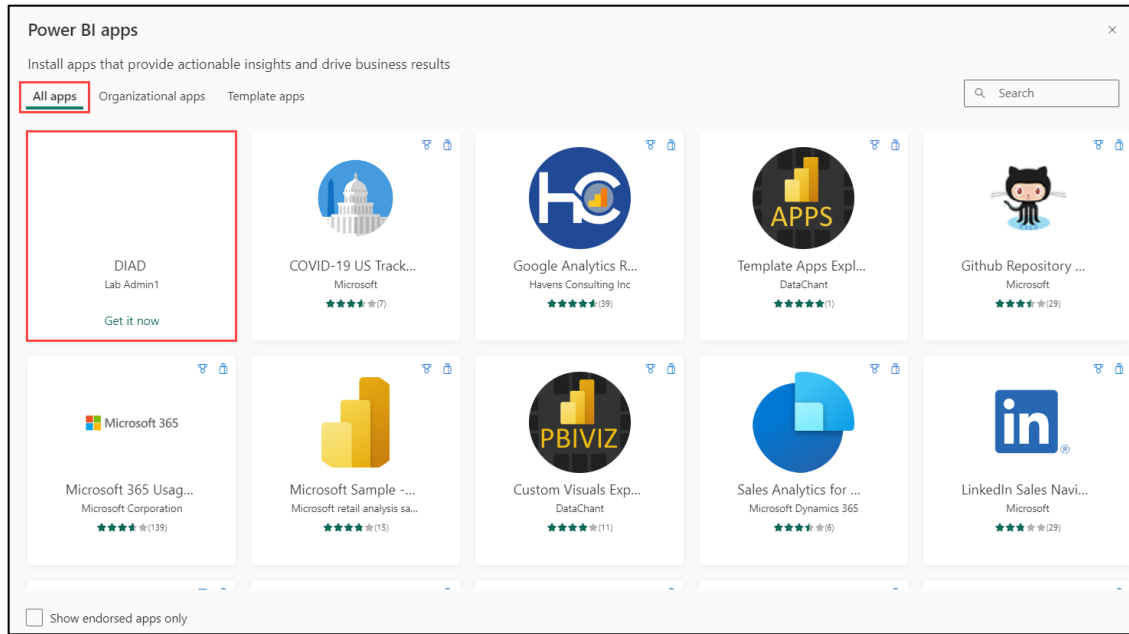

21. From the navigation pane to the left, select **Apps**.

22. Then, select **Get apps**.

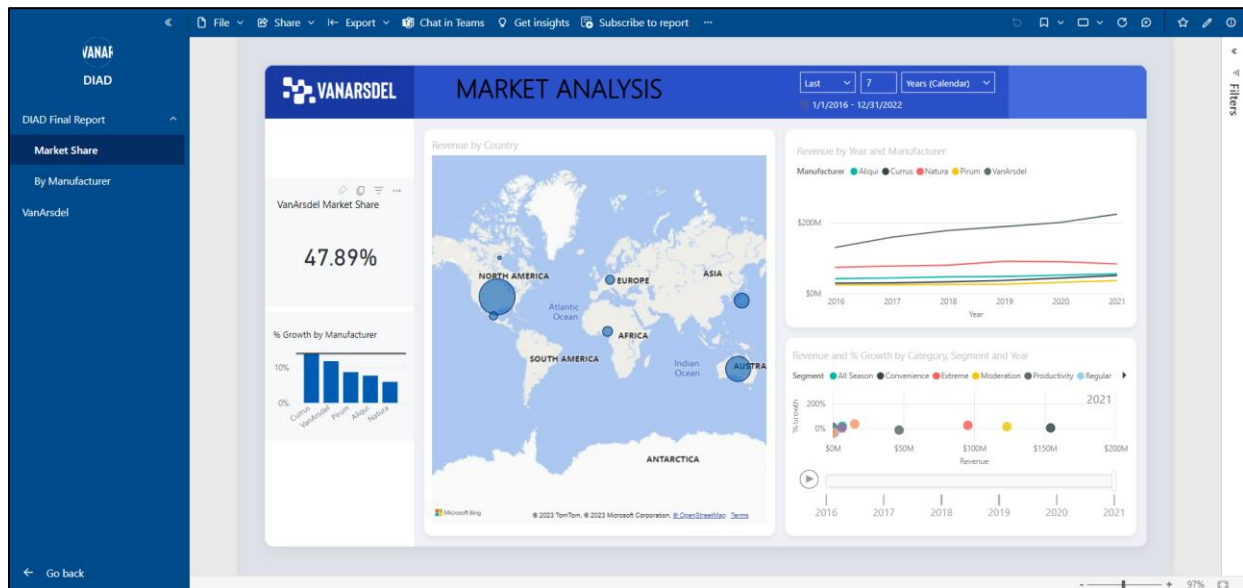

23. The **Power BI apps** dialog box opens. You will notice the **DIAD** app is listed under the **All apps** tab. Select the newly added **DIAD** app.

This is a one-time registration. Going forward, when you select **Apps** in the left pane, you will see the **DIAD** app in the list of Apps you have registered.

Your newly created DIAD app should look similar to the one in the figure below:

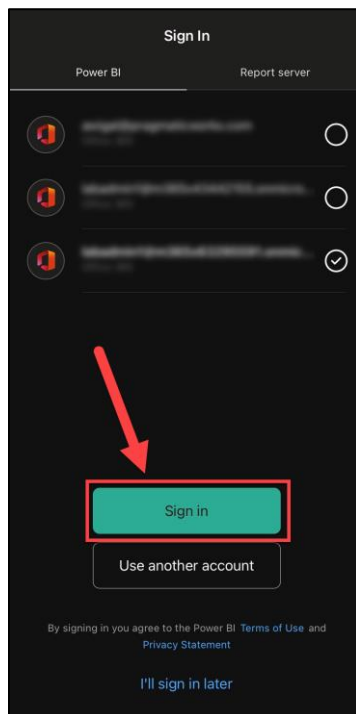

Power BI Mobile – Accessing Report on Mobile Device

1. Open the **Power BI Mobile app** on your mobile device.

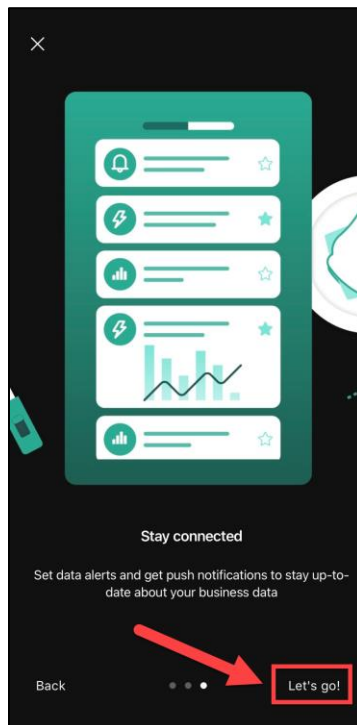

2. Select **Sign in** and follow the steps for entering your credentials.

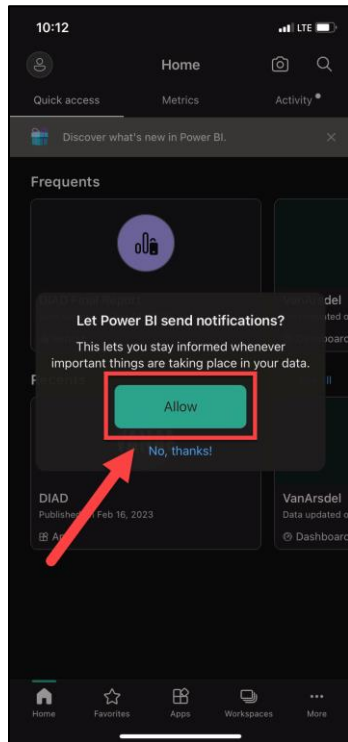

3. Once you have signed in, you will be prompted through a **walk-through of the app**. Select **Next** to continue through the app walk-through.

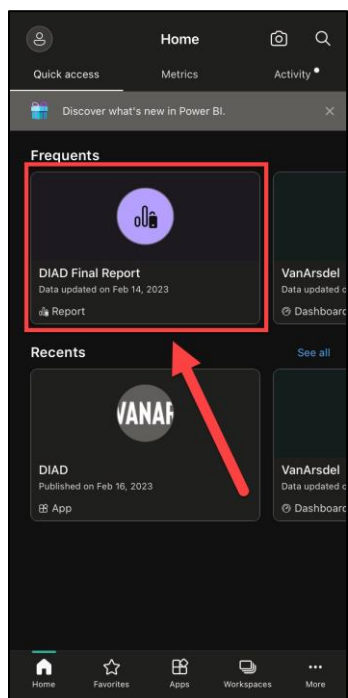

4. On the last page of the walk-through, select **Let's go!** to navigate to the **home** screen of the mobile app.

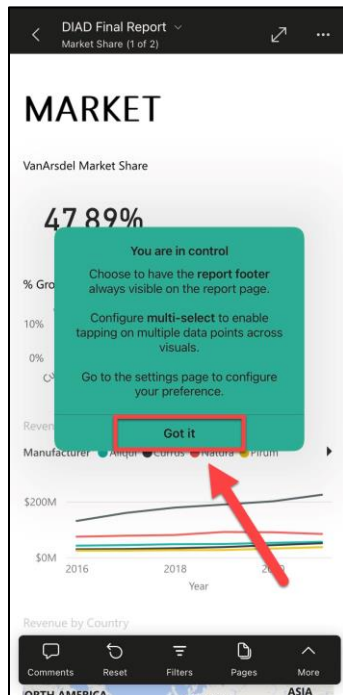

5. A dialog box will appear asking if you want to allow notifications from Power BI on your mobile app. Select **Allow** or **No, thanks!**

6. Once you have made the choice to allow notifications or not, you will see the main home screen of the Power BI mobile app. Under the **Frequents** section, select the **DIAD Final Report** (report).

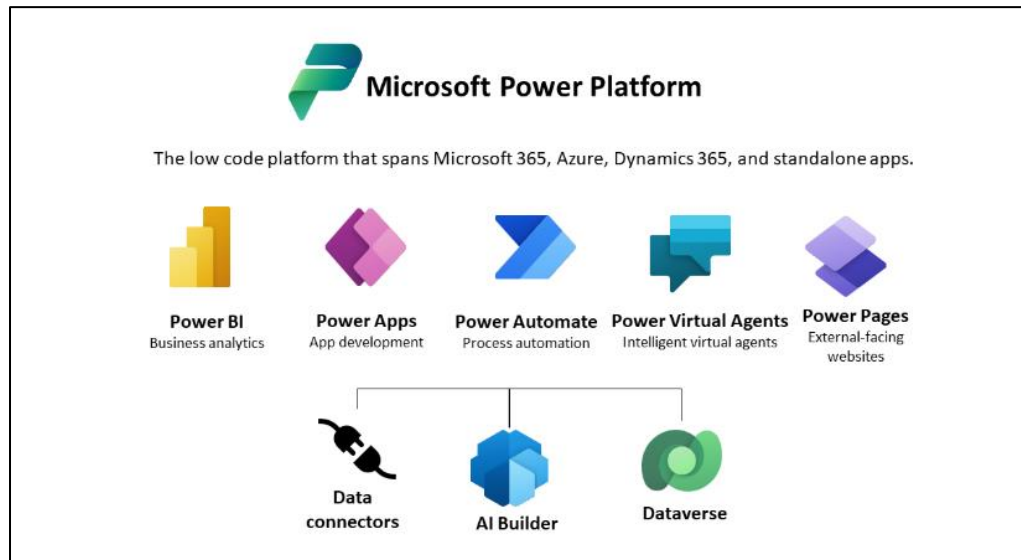

- Once you have selected the DIAD Final Report, a **You are in control** dialog box will appear. Select **Got it**.

- Lastly, you should see the mobile view you published from Power BI Desktop.

Further Exploration – Power Platform

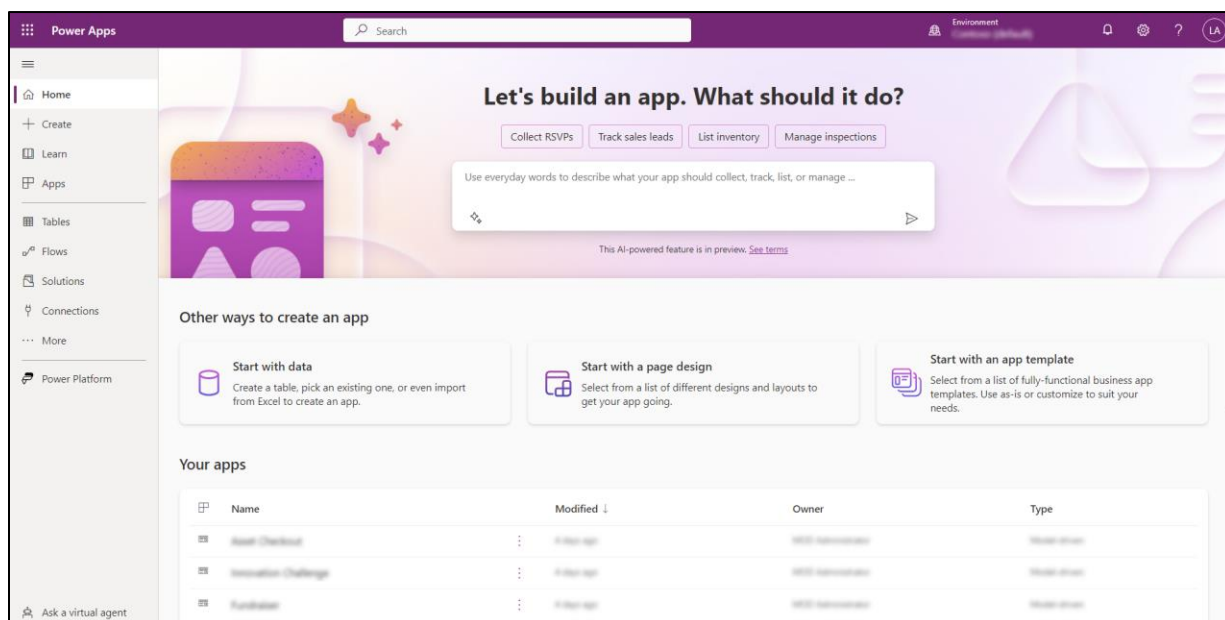

Power Apps

[Microsoft Power Apps documentation - Power Apps | Microsoft Docs](#)

Suite of apps, services, and connectors, as well as a data platform, that provides rapid development environment to build custom apps for your business needs.

Quickly build custom business apps that connect to your data, stored either in the underlying data platform (Microsoft Dataverse) or in various online and on-premises data sources.

Additional Power Apps training

Power Automate

<https://docs.microsoft.com/en-us/power-automate/getting-started>

What can I do with Power Automate?

- Automate business processes
- Send automatic reminders for past due tasks
- Move business data between systems on a schedule
- Connect to almost 400 data sources or any publicly available API
- You can even automate tasks on your local computer like computing data in Excel

Additional Power Automate training

Dataverse

[What is Microsoft Dataverse? - Power Apps | Microsoft Docs](#)

Dataverse lets you securely store and manage data that's used by business applications. Dataverse allows data to be integrated from multiple sources into a single store, which can then be used in Power Apps, Power Automate, Power BI, and Power Virtual Agents along with data that's already available from the Dynamics 365 applications.

Why use Dataverse?

- Easy to manage
- Easy to secure
- Access your Dynamics 365 data
- Rich metadata
- Logic and validation
- Productivity tools

Additional Dataverse training

By using this demo/lab, you agree to the following terms:

The technology/functionality described in this demo/lab is provided by Microsoft Corporation for purposes of obtaining your feedback and to provide you with a learning experience. You may only use the demo/lab to evaluate such technology features and functionality and provide feedback to Microsoft. You may not use it for any other purpose. You may not modify, copy, distribute, transmit, display, perform, reproduce, publish, license, create derivative works from, transfer, or sell this demo/lab or any portion thereof.

COPYING OR REPRODUCTION OF THE DEMO/LAB (OR ANY PORTION OF IT) TO ANY OTHER SERVER OR LOCATION FOR FURTHER REPRODUCTION OR REDISTRIBUTION IS EXPRESSLY PROHIBITED.

THIS DEMO/LAB PROVIDES CERTAIN SOFTWARE TECHNOLOGY/PRODUCT FEATURES AND FUNCTIONALITY, INCLUDING POTENTIAL NEW FEATURES AND CONCEPTS, IN A SIMULATED ENVIRONMENT WITHOUT COMPLEX SET-UP OR INSTALLATION FOR THE PURPOSE DESCRIBED ABOVE. THE TECHNOLOGY/CONCEPTS REPRESENTED IN THIS DEMO/LAB MAY NOT REPRESENT FULL FEATURE FUNCTIONALITY AND MAY NOT WORK THE WAY A FINAL VERSION MAY WORK. WE ALSO MAY NOT RELEASE A FINAL VERSION OF SUCH FEATURES OR CONCEPTS. YOUR EXPERIENCE WITH USING SUCH FEATURES AND FUNCTIONALITY IN A PHYSICAL ENVIRONMENT MAY ALSO BE DIFFERENT.

FEEDBACK. If you give feedback about the technology features, functionality and/or concepts described in this demo/lab to Microsoft, you give to Microsoft, without charge, the right to use, share and commercialize your feedback in any way and for any purpose. You also give to third parties, without charge, any patent rights needed for their products, technologies and services to use or interface with any specific parts of a Microsoft software or service that includes the feedback. You will not give feedback that is subject to a license that requires Microsoft to license its software or documentation to third parties because we include your feedback in them. These rights survive this agreement.

MICROSOFT CORPORATION HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH REGARD TO THE DEMO/LAB, INCLUDING ALL WARRANTIES AND CONDITIONS OF MERCHANTABILITY, WHETHER EXPRESS, IMPLIED OR STATUTORY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. MICROSOFT DOES NOT MAKE ANY ASSURANCES OR REPRESENTATIONS WITH REGARD TO THE ACCURACY OF THE RESULTS, OUTPUT THAT DERIVES FROM USE OF DEMO/ LAB, OR SUITABILITY OF THE INFORMATION CONTAINED IN THE DEMO/LAB FOR ANY PURPOSE.

DISCLAIMER

This demo/lab contains only a portion of new features and enhancements in Microsoft Power BI. Some of the features might change in future releases of the product. In this demo/lab, you will learn about some, but not all, new features.
